

2020 COVID-19 Pit Lane & Race Starts Procedure

- Only Teams actively participating in the current session are allowed on Hot Pit Lane.
- Access gates onto and off of Hot Pit Lane will be restricted and labeled accordingly. Any 2-way gates will be labeled to allow 6' between entry and exit.
- Bikes will have to be launched from The Paddock. At the end of each session, machines will be directed either up into the Paddock or Parc Formé (schedule dependent).
- Spacing of Pit Stalls will be implemented by the Pit Stall assignments. Individual Teams participating in the same session will not be allowed to occupy adjacent Pit Stalls. Pit Stalls will be assigned alternately based on Class.
- Team members of different teams must maintain 6' physical distancing on the signaling wall. Signal wall will be marked with 6' spacing. Only ONE team member per bike is allowed on the Signal Wall at a time.
- ALL races will use the Quick Start Procedure outlined below. Please familiarize yourself with this procedure and plan accordingly. Countdown to the opening of Pit Exit for the Sighting lap will ONLY be announced via Team Radio channel. With only 60 seconds to exit Pit Lane for the Sighting Lap, **RADIOS ARE CRITICAL!!!**
- Based on your location in the Paddock, it can be a VERY long distance to the Grid. Please begin early creating a plan to both launch the bike from the Paddock and get 1 mechanic to the Grid for the Race Start.
- There will be no volunteer Row Marshals. Depending on the sizes of the fields, we may be limited to having a Row Marshal (MotoAmerica Staff Member) at every OTHER row (ie. Rows 1.3.5....). We will notify teams via Team Radio prior to the affected Race Starts.
