RE: 2024 Daytona 200 Fuel

Racers,

As many of you know, MotoAmerica has been using VP MGP Reg for many years as the spec fuel for the majority of their pro classes, including Superbike, Supersport and Stock 1000. This fuel was developed to meet the FIM World Superbike rules, but at a lower, more cost-conscious price point. Beginning in 2024, MotoAmerica will begin to use VP MGP-R Reg, a new fuel developed at VP Racing's labs in Texas, that maximizes performance under the FIM World Superbike rules, and will be the spec fuel for the same classes as VP MGP Reg was.

After discussions with MotoAmerica regarding this year's Daytona 200, VP has made an arrangement to offer the remaining VP MGP Reg inventory to all racers at this upcoming event at a heavily discounted price. MotoAmerica will allow VP MGP Reg or the new VP MGP-R Reg to be used at the Daytona 200. After the 200, only VP MGP-R Reg will be allowed in the classes that are specified by Moto America. VP MGP will be sold at the Daytona 200 race event for \$8.00/gallon, which is about a 40% discount from last season and close to 50% discount off the new VP MGP-R. We are clearing out this inventory, so availability will be based on a first come first served basis, via the MotoAmerica pre-order form, while supplies last. VP MGP is still a great fuel for practice, testing and club type events, has a long shelf life in a sealed drum, so feel free to take advantage of this great offer and order extra to take with you after the 200.

Sincerely,

A handwritten signature in blue ink that reads 'Bruce Hendel'.
