

MOTOAMERICA COMPETITOR BULLETIN

05-2020

6/28/20

MotoAmerica and the AMA have determined that section 2.9.10.1.k could be misinterpreted and the rulebook will be edited as follows:

k. Additional seat brackets may be added. Non stressed protruding brackets **of the subframe (if equipped as indicated in section 2.3.1b)**

As such, modifications to brackets found to not be a performance advantage and addressed by the statement above may be allowed for the remainder of this event. Weight requirements still must be respected. All machines must be in compliance for Round 3 at Road Atlanta.
