01-5000-24 Yamaha R1 Connecting Rod Modification

All MotoAmerica teams and competitors,

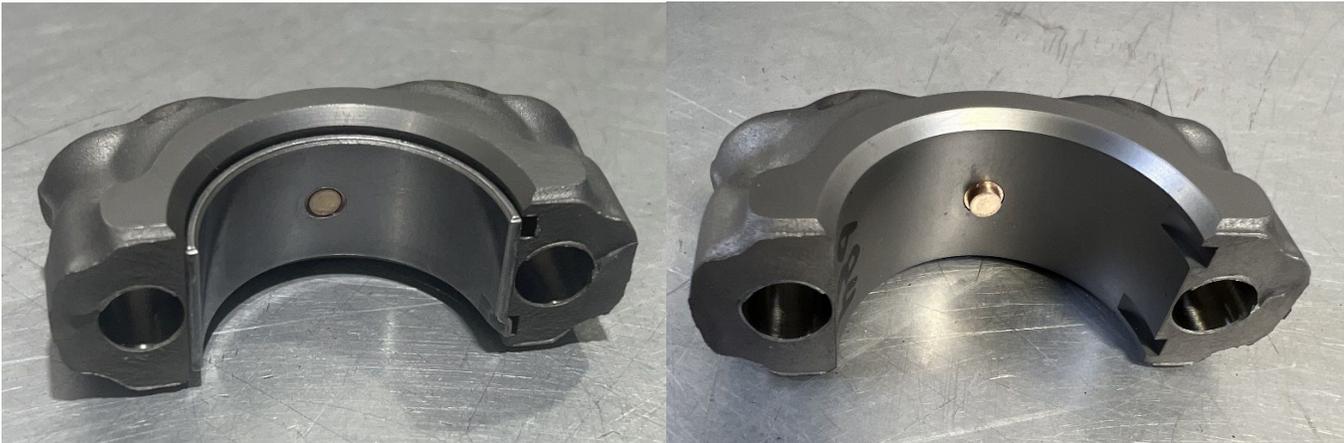

MotoAmerica, and AMA have approved the following modifications to the Yamaha R1 Connecting rods.

Class allowed: Superbike.

Allowance: Installation of a big end connecting rod bearing locating pin. The pin is installed in the rod cap (see pictures).

The allocation for Yamaha R1, aims to eliminate the rotation of rod bearings, to enhance the longevity of connecting rods. This process contributes to smoother operation, reduced wear and tear, and overall improved engine reliability.

The Modification and installation will be available from Attack Performance. The modification will be performed for any team requesting the modification. The cost for the modification is \$200 a set including all parts and labor.
